ASQ World Conference on Quality & Improvement  
Minneapolis, MN

# Imagine a world without quality...

Air bags will deploy under conditions for which they are not intended, causing serious injury.

Millions of people will get sick from water contamination.

More than 50,000 Americans will die from medical errors this year.

Because of the importance of quality in every aspect of your life and career, ASQ is focusing the 2009 World Conference on Quality and Improvement to extend its efforts to create, promote, and grow the culture of quality on a global scale. Join us in Minneapolis May 18-20, 2009, to get the tools, knowledge, and resources you and your organization need to make quality your priority.
